

About Us

An independent materials testing Laboratory for soil, aggregates, concrete cubes & block works and asphalt . It provides a battery of quality control tests to the construction sector for both government and private building projects, roads and earthworks . Among the many accreditations are full approval from Ministry of Economy and Commerce, Ministry of Environment (Laboratories and Standardization Affairs), Public Works Authority & We are an Accredited by A2LA (American Association for Laboratory Accreditation) ISO 17025:2017 Laboratory.

Teyseer Laboratories managed by qualified engineer and very experienced Lab Technicians for the last 30 years . In these years we have no complaints from our clients whether in the government and/or private customers. Our goal and policy is to achieve customers satisfactions in services and communications . Our Technicians are under constant training, keeping up with the latest standards in testing, standards like QCS 2014, BS EN, ASTM and AASHTO . Comparison tests among other labs within the state of Qatar and the PTP tests with (PTA) Profency testing Australia.
