

Quality Policy Statement

At Teyseer Laboratories we are committed to quality as we provide services in sampling, testing and analysis of Construction materials (Roads and Buildings), Soil, Water, Aggregates, Concrete and Asphalt in accordance to the International Standards, Like BS, BSEN, ASTM and AASHTO with all the customer expectations, applicable regulations and standards laid by National (QCS) and International bodies (BS, BSEN, ASTM and AASHTO).

We ensure that accurate and timely testing services are done continuously to meet or exceeded the stated or implied customer requirements by following the requirements of ISO 17025:2017 Standard.

Our objective is to:

- All personnel concerned with testing and calibration activities familiarize themselves with the quality documentation and implement the policies and procedures at all times in their work.
- All the personnel concerned with testing must be competent, qualified and trained enough to perform particular tasks assigned to them.
- As a testing laboratory we are sworn to perform our activities impartially, and identify risk to impartiality as they arise on time to time to time basis.
- If a risk to impartiality arises, a mitigation plan must be executed.
- We are committed to maintain enough resources for the consistency and smooth operation of laboratory.
- Meet the current and future requirements of our customers with a commitment of attention to detail and service by all our staff
- To regularly take part in proficiency testing, inter-lab comparison tests with other labs.
- Training technicians to improve and encourage them to perform new tests and to familiarize themselves to latest International Standards.
- To attain latest lab equipment and technology to improve the quality of testing.

The management of Teyseer Laboratories is committed to follow the requirements of ISO 17025 standard and continuously improve the effectiveness of the management system.

Mr. Khalid Al-Mannai

General Manager
